PROFESSIONAL SUMMARY

Computer Engineering graduate student at the University of Maine with hands-on experience in embedded systems, IoT automation, and full-stack web development. Proficient in Python, C++, JavaScript, React, and Node.js, with hardware-level skills in Arduino programming and PCB design. Effective across the full stack and close to the hardware.

EDUCATION

University of Maine

Master of Science in Computer Engineering.

2025

University of Nairobi

Bachelor of Science in Microprocessor Technology and Instrumentation. Second Class Upper Division.

2022

EXPERIENCE

Citizen Radio Analyst

2021 – January 2023

Cloud Factory Kenya

- Monitored and transcribed US police radio clips to generate real-time incident updates for the Citizen personal safety app, the No. 1 personal safety app in the U.S., averaging 50 incidents per shift.
- Resolved rapidly delivered address information from dispatchers during high-priority incidents across major US markets including Los Angeles, Chicago, and San Diego.
- Reviewed fellow analysts' incident reports and provided written feedback, flagging incorrect locations and misjudged information at supervisors' request.
- Collaborated across a distributed team covering multiple US cities to maintain consistent and accurate incident reporting.

PROJECTS

Plant Disease Identification Model

- Built a machine learning model in Python using deep learning techniques to classify plant diseases from user-uploaded images, enabling rapid diagnosis for farmers and agricultural users.
- Developed as part of Master of Science coursework at the University of Maine.

CERTIFICATIONS

- ICDL (International Computer Driving License) — Alphax College
- React Development — Scrimba (Bob Ziroll)
- Web Development Bootcamp — Udemy (Angela Yu)
- DAM JavaScript Bootcamp — Apprentice Cloud Kenya
- PHP Web Development — eMobilis Kenya

SKILLS

Languages: Python, C++, JavaScript, PHP, HTML, CSS

Frameworks and Libraries: React, Node.js

Embedded Systems and Hardware: Arduino, IoT (Internet of Things), PCB Design

Tools and Platforms: GitHub, Jupyter Notebooks, Anaconda, VS Code, Heroku, Netlify
